

Patrick Sheridan

Full Stack web developer with a diverse background in Environmental Science and Medical Research. Dedicated to improving the world one line of code at a time.

Experience

Fluke Corporation

May 2018 - October 2018

Front End Web Developer for Thermal Imaging: As the dedicated front-end developer for the Thermal Imaging(TI) department, my responsibilities included the launching of new TI products globally on the Fluke websites, management of other developers, and the creation of custom, mobile-friendly landing pages. I was also tasked with creating marketing emails in Eloqua, writing of internal company scripts, and building of experimental product and landing pages.

Fluke Corporation

October 2017 - May 2018

Front End Web Developer: Responsibilities included maintaining and updating Fluke's website for 63 regions in 23 different languages. Done through the use of multiple Content Management Systems; Drupal, Clickablity, PCAT, and Microsoft CMS 2002.

CodeFellows Seattle

January 2017 - June 2017

Sudent (fulltime): High intensity coding bootcamp focusing on learning the MEAN stack, full stack web development. Here, I learned and worked with other passionate people to hone my coding abilities, realize projects, and continue development of interpersonal skills.

U.S. Forest Service, Arapaho National Forest

April 2016 - September 2016

Biological Science Aid: Using a systematic approach and a variety of methods, my crew and I applied specialized herbicide to control and eliminate invasive plant species throughout the district. Utilizing multiple delivery systems, we were able to target specific noxious plant species with minimal environmental impact.

LabCorp Seattle

January 2015 - September 2015

Laboratory Assistant: At this position, I was responsible for the preparation of laboratory specimens prior to analysis and testing. For each sample received, I would transcribe patients handwritten medical info into the system, label each sample, and carefully aliquot each specimen to send to each testing department.
